

Alternaria subgroup

- Concrete actions on *Alternaria* in 2026 and until next workshop

Monitoring early blight in potato worldwide (TUM (Hans Hausladen), CAU (Remco Stam), Uvigo (Laura Meno))

- Species diversity
- Fungicide resistance
- → based on whole genome sequencing
- → maps for species distribution, resistance distribution (similar to late blight, integration to API)

Importance of ICM increasing because of less fungicide solutions

- Crop rotation!
- Biostimulants, Biocontrol
- Fertilization, overwintering and wild reservoirs
- → collect already existing data

Discuss and develop shared protocols for sampling and meta data collection

People would like to join and collaborate with sampling, contact with

- **Hans Hausladen** hans.hausladen@tum.de
- **Gonne Clasen** g.clasen@phytomed.uni-kiel.de
- **Laura Meno** laura.meno@uvigo.gal
