The Blight Manager DSS

Field in experiments

Folva

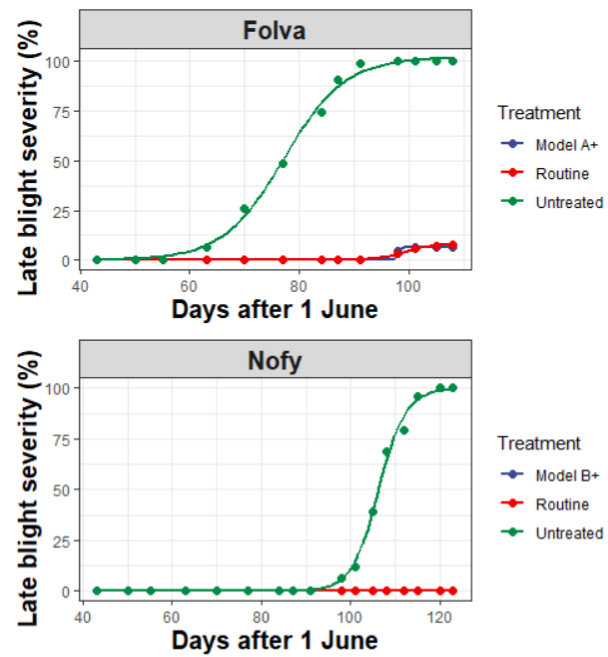

- Untreated
- Routine: weekly 0.5 l/ha
Ranman Top
- Model A+

Nofy

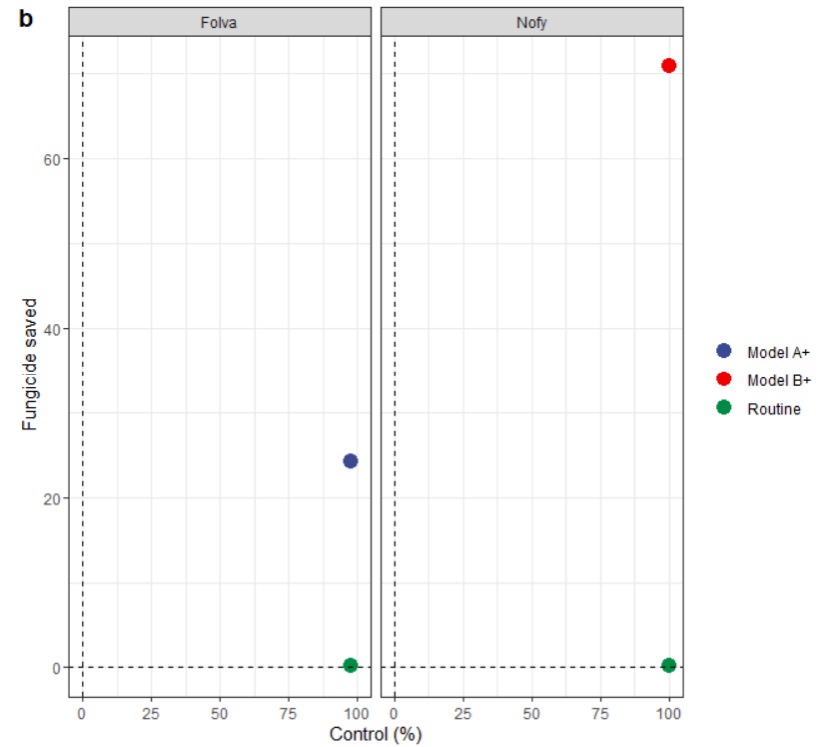

- Untreated
- Routine: weekly 0.5 l/ha
Ranman
- Model B+

Disease development and fungicide saved

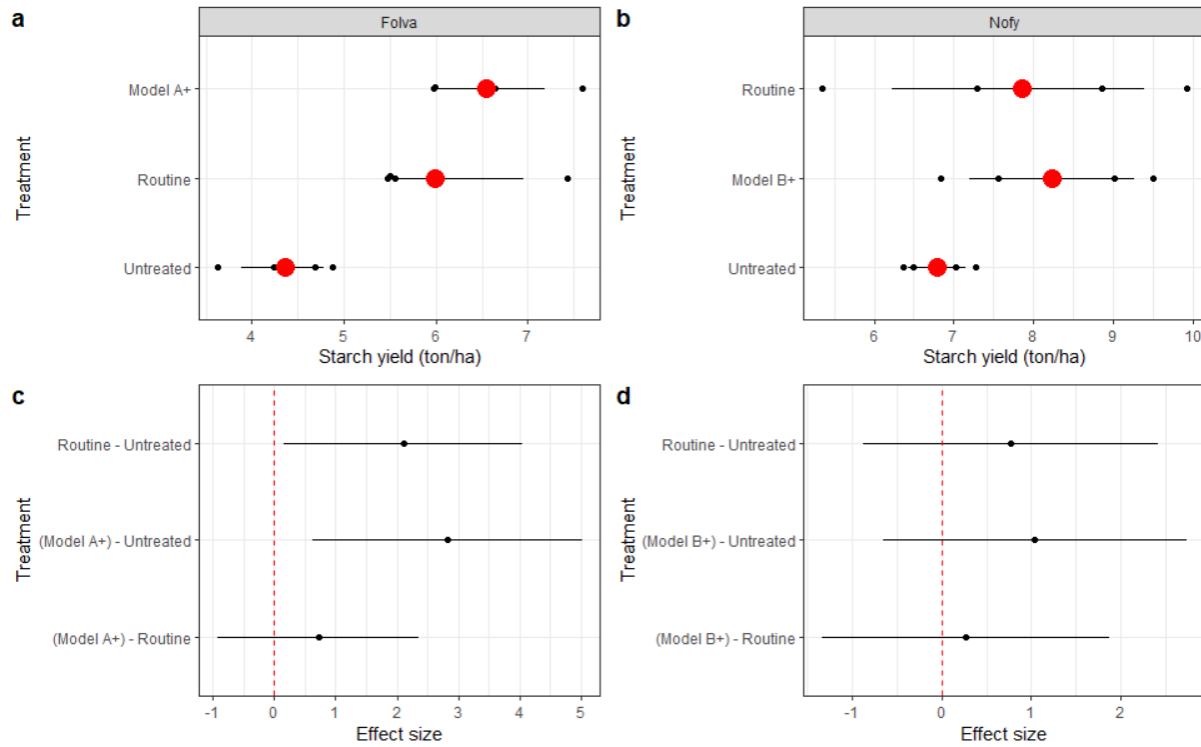

a

b

Starch yield

Conclusions

- There is a huge potential to reduce fungicide (~60%) use in resistant cultivars
- There was a moderate, but significant fungicide reduction (~25%) in the susceptible cultivar (Folva).
